

BRIEF INTRODUCTION

Founded in 1995, DFL Bearings Factory is one of the largest suppliers of rolling bearings in China. Our factory is located in Lin Xin county, Capital of Chinese bearings, which adjoins three main railway lines of Jing-Guang, Jing-Jiu, Jing-Hu. The transportation is convenient and the environment is graceful.

Our main products are deep groove ball bearings, tapered/cylindrical roller bearings, pillow block ball bearings, self-aligning ball bearings, thrust ball bearings etc which are widely used in automobile, motorcycle, mining, metallurgical, textile machinery, household appliance and other industries. With high reputation of superior accuracy and competitive price, our bearings have been exported to more than 12 countries, including Southeast Asia, Europe, Africa, Middle east etc. Our trade marks "NSAR" and "3D" have been becoming prevalent and have enjoyed a high reputation on the world market.

Comparing with other bearing suppliers in China, "NSAR" bearing has following advantages in competition:

- ▲ Owing the excellent manufacturing equipments and full sets of first-class testing instruments.
- ▲ Using the raw materials of high quality
- ▲ Improving managements of production continuously by absorbing the advanced management and production modes.
- ▲ Possessing 2 superior engineers and four engineers together with skilled workers

We will adhere to the principle of "unsatisfied in quality, efficiency in work, loyal in business". We sincerely welcome customers to consult business with us.
